PRODUCT TECHNICAL DATA SHEET

TTK-3700E

PFAS-free polymer processing aid masterbatch

Core Advantages

1.High–Efficiency Lubrication:Reduces die buildup in film extrusion;eliminates sharkskin defects.
2.Eco–Compliant Formulation:PFAS–free; meets RoHS/REACH standards.
3.Cost Reduction & Efficiency:Reduces equipment wear and maintenancecosts.

Applications

Applications	Details
PE Film	Blown film and cast film extrusion — improves melt–flow and surface smoothness
Pipe	Pipe extrusion — enhances forming performance and reduces die buildup
Wire & Cable	Wire & cable extrusion — improves surface quality and processing stability

Chemical Name

PFAS–free polymer processing aid masterbatch

Physical Properties

Parameter	Spec	Method
Appearance	Milky white pellets	Visual inspection
Carrier resin	LDPE	–
Melt index (190℃/2.16kg)	5–10 g/10min	ASTM D1238
Bulk density	0.45–0.55 g/cm3	ASTM D1895
Moisture content	⩽2000 ppm	Karl Fischer
Recommended dosage	0.5–5%	–

Usage Instructions

1.Mix with compatible resin at the required ratio and extrude directly.
2.Recommended dosage: 0.5—5%, adjust based on actual process conditions.
3.Use the mixture within 24 hours after blending for optimal performance.

Corona Treatment Decay Test Data

Test Conditions: TTK-3700E @ 1% addition, PE film substrate

Sample	Off-line	3 D	7 D	14 D	21 D	30 D
Competitor Product （3%）	45	42	40	40	40	40
TTK-3700E(1%)	45	42	40	40	40	40

※ Values are corona treatment strength (mN/m)

Quality Assurance & Storage

Item	Description
Quality standard	Complies with Q/JN001-2024 Enterprise Standard
Storage conditions	Cool & dry; avoid direct sunlight and rain
Shelf life	12 months under recommended storage
Packaging	25 kg/bag, paper-plastic composite
Transport requirements	Avoid moisture, contamination, mechanical damage

Environmental Compliance Declaration

Regulation & Standard	Status	Remarks
RoHS 2.0 (EU) 2015/863	[OK]	Restriction of Hazardous Substances
REACH (EC) 1907/2006	[OK]	Registration, Evaluatin & Restrictionon, Authorisatio of Chemicals
PFAS	[OK]	PFAS-free formulation — meets defluorination demand
SVHC	[OK]	No substances on the SVHC candidate list

Safety Information

1.Non-hazardous. Use in a well-ventilated area.
2.Avoid eye/skin contact. Wear protective gloves and safety goggles.
3.Rinse immediately with plenty of water and seek medical attention if contact occurs.
4.For industrial use only. Not suitable for food contact or medical implant applications.
